the essence of weaving

Company Profile

SunWeave International

Working with internationally acclaimed designers and the best modern materials, SunWeave International manufactures furniture of exceptional quality and design.

Founded in 2005 and now carrying more than 100 products, SunWeave is best known for its innovative and efficient approach to producing attractive woven furniture that transforms outdoor areas into sophisticated, relaxing spaces – and looks equally spectacular indoors.

Building upon the management team's experience in the outdoor furniture and technology industry, SunWeave has streamlined the production and packaging of its outdoor furniture to keep prices low without sacrificing quality or its commitment to good design.

Built To Last

Using traditional hand-weaving techniques, modern woven furniture is created from Viro® fibre, which is resistant to sun, rain, salt and chlorine and will also stand up to food and drink spills. Structural strength is provided by top quality ultra-light powder-coated aluminium. Sunbrella® covered cushions add extra comfort and are also tough enough to cope with the wear and tear of outdoor living. Textiles from FERRARI including Batyline® and STAMSKIN provide a comfortable, easy to clean and UV resistant that material at is robust, and exceptionally comfortable for outdoor furniture.

Manufacturing

SunWeave's design and quality control team monitor every step of the process. Only the very best materials that can cope with all weather conditions, in any location, are selected and all SunWeave furniture is tested for comfort, ergonomics and durability.

The Environment

Our planets wellbeing is important to us all. At SunWeave our raw materials are 100% recyclable. We do our utmost to supply sustainable quality furniture that takes our planets precious resources into account.

A close-up photograph of a wicker chair. The chair is made of a light brown, woven material, likely rattan or seagrass, with a tight, consistent weave. A rectangular, light grey cushion is placed on the seat. The word "Key" is written in a large, white, elegant script font across the middle of the chair's backrest. The background is plain white.

Original Design Manufacturing

Outdoor furniture is harder to produce than regular furniture. This is predominantly due to the harsh environment that outdoor furniture must endure on a daily basis. Raw materials selection and manufacturing process are incredibly important as they make up the building blocks of the design and ultimately the finished product.

SunWeave provides Original Design Manufacturing (ODM) capabilities to customers who are seeking a partner in Asia with outstanding capabilities in outdoor furniture and accessories production. The ODM model allows brand firms to produce without the need to engage in the operation of a factory or related services.

Our expert production and manufacturing team can handle all aspects of production (from concept through to high volume production) for multiple clients with multiple designs and brands.

If your company is a medium or large enterprise focusing on retail, wholesale or procurement our manufacturing team can deliver your outdoor products on time using your choice of materials, design and brand.

Our expert management can help you tailor the right mix of manufacturing capabilities to meet the needs of your market.

Construction

All our products are hand crafted to perfection from their exteriors to the inner cores and ample detailed finishes. Our woven products use Viro® fibers on the exterior with a minimum of three millimetres aluminum tube frames within. Our Absolute Stamskin® synthetic leather products are carefully wrapped around quick dry foam and aluminum frames providing the greatest outdoor luxury. Finally the SunWeave PRO line utilizes anodized aluminum frames with a selection of Batyline® slings with carefully selected teak trimmings delivering a hardy functional product.

The Sunbrella® fabrics that cover our cushions encompass the occupant with that little extra luxury giving the residential or commercial customer that extra level of comfort. Sunbrella® fabrics are UV, chlorine and stain-resistant making it the leading choice for outdoor cushions.

Care

Outdoor furniture endures the harshest environments. From the chilling snows to the scorching heat our products can withstand these extremes with ease. Our carefully selected materials bring true carefree outdoor furniture to the home or commercial environment. Simply clean with a water based agent to remove the expected build up of everyday environmental stains, no advanced chemicals are required. Cushions are there to be enjoyed and a little care is needed to maximize the experience. Our cushions are water resistant. In the event they do get wet, the cover should be dried separately from the filling. In the event of a soiled cushion machine wash the Sunbrella® cover.
